Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 and 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Batcheller. Batcheller teaches the claimed invention including upper handle 47, lower handle 43, upper jaw 45, lower jaw 42, an adjustable ram 35, a inherent wrench (adjustable means) to adjust the ram 34 (not pictured), and a lock nut 53.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-13 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Batcheller alone or further in view of Klein. Batcheller teaches the use of a single ram with an adjustable ram to be old by use of a threaded shaft 35 and locknut 53 and opposed by a lower depression in the lower arm. Hence Batcheller teaches the claimed invention excepting the use of two adjustable rams and opposing lower depressions to make a pair of dimples in the tubular member. To have multiplied the effect of Batcheller to what ever number desired and possible would have been an obvious choice of tool design rendering no new or unobvious result. Moreover, Klein teaches

Art Unit: 3725

the use of double rams or dimplers in a plier like tool 48 and 51 for forming a pair of dimples in a tubular member 12. It would have been obvious to one of ordinary skill in the art at the time of the invention to have multiplied the adjustable rams as desired when taken in view of Klein which teaches such a doubling of rams to be old and well known.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
